

## Industrial Plant Visit on 09.05.2025

**B.Tech. Food Technology (2nd Year) Students**  
**Namaste India Foods Pvt. Ltd., Modinagar, Ghaziabad, Uttar Pradesh**

An industrial visit to Namaste India Foods Pvt. Ltd., Modinagar, was organized for the B.Tech Food Technology 2nd year students as part of their experiential learning and industry exposure program. The visit aimed to provide students with practical insights into modern dairy processing operations and the functioning of large-scale dairy industries.

During the visit, students observed various stages of milk processing, packaging, and quality control practices followed at the plant. They interacted with plant professionals, who shared valuable knowledge about production processes, hygiene protocols, automation in the dairy industry, and the importance of quality assurance.

This one day educational trip enriched the students' understanding of industrial food processing, helping bridge the gap between theoretical learning and practical implementation. The visit was highly informative and contributed significantly to their professional development.

**Faculty member accompanied by:**

- 1.Er. Ankur Trivedi, Assistant Professor (Dairy Technology)
- 2.Dr. Nimisha Tehri, Assistant Professor (Food Microbiology)
